

# California Enterprise Architecture Defined

**Vision** -To enable better information technology decisions that are driven by the business needs of the state in the delivery of services.

**Defined** - A strategic information asset base, which defines the business, the information necessary to operate the business, the technologies necessary to support the business operations, and the transitional processes necessary for implementing new technologies in response to the changing business needs.

- Federal CIO Council

**Segment Approach** – Promotes the incremental development of architecture. Based on the IT Strategic Plan, focus initially on

- Portal Technology
- Business Management Function
- Security
